W2IHY EQPLUS 8 Band EQ

£379.96

DESCRIPTION

The EQplus is designed to be directly attached to either your microphone (Icom, Yaesu or Kenwood) or to the W2IHY's 8-band EQ (W2EDGE), or to your Kenwood, Icom or Yaesu HF transceiver. The EQplus provides Audio Compression, Downward Expansion, Effects and connectivity to three radios. There is a choice of three different mic impedances, 200, 600 and 50k Ohms, and there is a 5V supply for mics that require this such as Icom HM-12, HM-36 and SM-6 and Heil HMI and ICM which can be plugged in direct to the unit.

Features include a LED bar graph which indicates pk-to-pk audio levels, equaliser with separate Bass and Treble controls and Compressor /Downward Expander. There are two effects in the Effects Processor, Effect 1 emulates dampening sound reflecting multiple time from a surface, and Effect 2 emulates sound reflecting once from a surface plus there is a delay control which controls the speed delay up to 80 milliseconds

- * Audio compression * Downward expansion
- * Mic input impedance 200/600 Ohms or High
- * Headphone monitor * LED level indicators
- * Input: 8-pin, phono or Aux * Supply: 12V DC
- * Size 228 x 100 x 130mm
- * Weight 530g
