## MFJ-9030 30 Meter CW Transceiver

**£247.96**

### DESCRIPTION

MFJ-9030 30 Meter CW Transceiver. You'll be amazed at how easy it is to work the world running only 5 Watts! MFJ's CW radios are so light and compact you can take them anywhere -- trips, vacations, backpacking, even biking!

Here's what you get;

**Easy Operation:** The most user-friendly radio you'll ever own. Sets up in seconds -- no microprocessor mumbo jumbo.

**Great sensitivity:** hotter-than-ever superhet receiver brings weakest signals in at full volume (Super-quiet FET post amp stage in the IF filter makes this the best CW receiver going).

**Excellent Selectivity:** Tight CW bandwidth crystal ladder filter fights unwanted QRM and noise to the maximum.

**Smooth and Stable VFO:** Wide spaced reduction drive VFO capacitor glides slowly across the easy-to-read dial.

**True RIT:** RIT control has center-detent -- makes listening or calling off-frequency a snap!

**Easy on your Ears:** Smooth AGC tracks only the signals you want to hear -- it never locks onto strong signals outside the audio bandpass. MFJ's InstantReovery AGC snaps the receiver back at full gain after transmitting.

**Built in speaker:** high efficiency 3" speaker driven by 100 mW of audio gives great volume.

**Rugged transmitter:** Motorola power amplifier transistor delivers full QRP output, tolerates opens and accidental shorts without damage.

**Sinewave Sidetone:** Pure 700 Hz CW sidetone makes sending as much fun as receiving!

**Semi-QSK:** Set adjustable hold transmit/receive switching to suit your normal sending speed or set it for full QSK during contests.

Easy to Power: It uses little power -- only 50 mA average on receive and 1.2 amp peak on transmit. Perfect for battery operation in remote locations!

Rugged Construction: MFJ CW radios are built on G-10 double-sided plate-through PC boards in our plant. Rugged all metal cabinet with brushed aluminum front panel and vinyl clad cover.
