Entel HX482S handheld transceiver with Selcall
£196.08

DESCRIPTION

Entekl HX482S handheld transceiver with Selcall

For those who want the benefits of 5-tone selective calling without the need for more than 16-channels or an LCD screen, the compact entry level selcall HX400 provides exactly what they require. From the compact ergonomic design that fits comfortably in your hand, to the exceptionally loud audio that enables you to communicate in the noisiest environments, this radio, positioned as an entry level 5-tone model, easily outclasses its competition.

With 16 channels, this model, like all our HX series portables, is built to meet the MIL-STD 810C/D/E/F rating for tough enduring performance and in addition has a superior IP55 splash proof construction.

Utilising the latest intelligent Lithium-Ion battery technology with battery cycle count* the entry

elimination of memory effect means there is no need to fully discharge the cells before recharging it. Therefore you are assured a full duty cycle each and every time you take your radio from its charger.

Both HT and HX series portables have the facility to scan for an active channel. When an active channel is found, the radio will automatically select that channel for you. Priority scan will allow you to select one channel in the scan list that is treated as a "Priority". It will be checked more frequently than all other channels in the list features to its range of radios. Using Flash Upgrade technology your radios can be upgraded by your Dealer at any time

Robust accessory socket

A completely redesigned accessory connector, when secured to the portable, is designed to withstand any amount of punishment from dropping to careless misuse. Furthermore, the securing bolt incorporates a shearing point to protect the connector.

On selcall and advanced variants, the connector provides a programmable interface for audio accessories and data devices, as well as a custom interface for any special applications.
