## Expert Electronics Colibri Nano SDR Receiver

**£239.95**

### DESCRIPTION

The Colibri NANO opens new horizons for HF band enthusiasts, thanks to its 14-bit ADC, which provides a ~110 dB BDR and up to 3 MHz sample rate. A 0.5 ppm local oscillator gives the Colibri NANO a great frequency stability. Using the Colibri NANO remotely, in some rural area will give you the lowest air noise you've ever seen while won't rob you from any comfort or functionality. The Colibri NANO is compatible with every popular HAM software such as HDSDR, SDRSharp and ExpertS DR2.
