IC-F3262D/ F4262D Series
£462.95

DESCRIPTION

IP67 Waterproof and Dust-tight Protection

The IC-F3262D series provides outstanding protection against dust and water that is equivalent to IP67. The IC-F3261D series can withstand 1m depth of water for 30 minutes and its dust-tight construction keeps out powder dust, sand, mud etc.

* To guarantee the IP67 rating, the BP-232WP battery pack must be used with the IC-F3262D series. The "IP67" label is attached to the BP-232WP for an identification mark.

Analogue FM Mode Features

- 5-Tone, CTCSS and DTCS
- MDC 1200 compatible
- Inversion voice scrambler
- Basic LTR trunking
- Audio compander

Other Features

- 512 memory channels with 128 zones
- Dot-matrix, multi-function display
- Large 2300mAh (typ.) Lithium-Ion battery
- MIL-STD 810 G rugged construction
- Mode dependent scan and priority scan
- DTMF autodial
- Busy channel lockout, repeater lockout
- Talk around function
- Time-out-timer
- Escalating alarm
- Surveillance function
- Power on password
- Low battery alert
- New optional MB-130 vehicle charger bracket

Accessories Included ;

BP232 battery

BC160 charger

Belt Clip

dPMR VHF/UHF Digital Handheld Series with GPS

The Icom IC-F3262D handheld is a radio series that combines a rugged, waterproof and dustproof construction with an in-built GPS receiver and IDAS dPMR digital technology.

NEW FEATURES

IDAS dPMR Features

The IC-F3262D series provides dPMR mode 1/2 operation. Compatibility with dPMR mode 3 operation planned. The following IDAS dPMR features are programmable:

- Individual/group call
- All group call
- Emergency
- Call log
- SDM (Short Data Message)
- Status message
- GPS
- Stun, kill and revive
- Digital voice scrambler
- Digital colour code
- Transparent data mode

Built-in GPS Receiver

The IC-F3262D series has an internally integrated GPS receiver*. Current position data can be attached to a voice or data (SDM, status or emergency signal) transmission and can be sent to dispatch stations*.

* Depending on version. * To show the received position data, an external PC application is required.

Man Down and Lone Worker Functions for Emergency Call

The integrated man down function* automatically sends an emergency signal when the transceiver is left in a horizontal position for a preset period. The lone worker function can also transmit an emergency signal when the radio is not operated for a preset period. These emergency signals can be sent with GPS position data* to alert your co-workers or dispatcher to any potential trouble.

* Depending on version.

800mW (typ.) Audio Output Power

The built-in BTL amplifier doubles the audio output power and the large 40mm speaker delivers loud 800mW (typ.) audio to receive all calls under noisy conditions.

New 14-pin Accessory Connector

The new 14-pin accessory connector enhances the IC-F3262D series performance and
